SIZE OF BALL DISCUSSED

Question Is Taken Up by Secretary Jenkins of Western Bowling Congress.

The question of the weight of ball allowed by the Western Bowling congress, of which Salt Lake and Utah bowlers are members, has come up for settlement. Secretary S. L. Jenkins of Seattle has sent the following letter to the congress' representatives for a mail vote. W. S. Zehring of this city is the local representative. The letter is as follows:

Members Executive Committee:

Dear Sir: As there seems to be a sentiment in some quarters to limit the weight of the ball to sixteen pounds before the annual tournament of the Western bowling congress, it has been decided to make a boil of the executive committee on that question.

You will find herewith enclosed a blank ballot, which you will please fill in as designated thereon and mail to me as the earliest possible moment. If a majority of the committee vote in favor of reducing the weight the limit hereafter will be sixteen pounds. of which Salt Lake and Utah bowlers are

this two-acre tract to Mayor Roylance of Provo for 60 cents per bushel, and at this price the orchard netted him \$800. Roylance has to pick the fruit, and today eighteen pickers began the task of gathering it.

But the remarkable thing about the orchard is the fact that less than 1 percent of the fruit is wormy, while last year more than 75 per cent contained worms, and neighboring orchards this year have from 50 to 90 per cent of wormy apples in them.

Last year Mr. Smart destroyed a fine orchard to make a bedding ground for sheep, because the fruit raised was wormy and unsalable and very likely would have destroyed this one, too, Professor Ball asked the use of the orchard for experimental purposes and it was given him.

He sprayed the trees twice, at a cost of 7 cents per tree, to obtain the results named. Some trees were sprayed five times and they show one-half of 1 percent wormy fruit, but the professor does not advise spraying the extra three times for one-half or percent wormy fruit, but the professor does not advise spraying the extra three times for one-half or percent wormy fruit, but the professor does not advise spraying the extra three times of the inviverity, showing the connection of the school to be exceptionally favorable.

He now has a force of men counting the apples, so as to get the exact percentage of wormy ones. Spraying at the right time and in the right way. Mr. Ball says, is the secret of his success.
